

A vintage brass compass with a detailed compass rose is the central focus, resting on an old, weathered map. The map shows various geographical features and text, including "Le Trinidad" and "S. Marie". A magnifying glass is partially visible on the right side of the frame, and another compass is partially visible on the left. The overall scene is dimly lit, with a warm, golden light source from the top left, creating a sense of historical exploration and discovery.

Meta-Analysis

1. Introduction

→ No approach to aggregate **empirical models** yet!

1. Introduction

Idea: Aggregate and map empirical models from different papers → **Variable Science Mapping (VSM)**

Why aggregation of empirical models and findings?

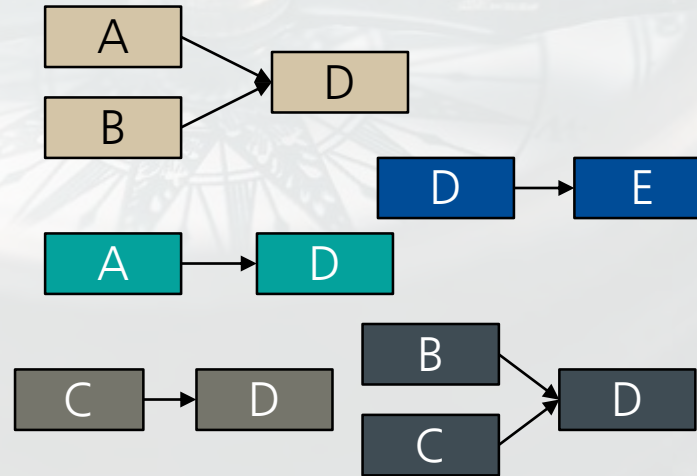

1. Overview of specific research fields/models
2. Detecting inconsistent results
3. Identification of research gaps

1. Introduction

Five **Research papers** on one topic

Five different **models**

Science map based on variables

2. Analyses

2. Analyses – Research Design

I. Systematic literature review

- Papers using **Classical Science Mapping (CSM)**
- 63 top-tier articles
- 12 steps (adapted from Christofi et al., 2021; Vrontis & Christofi, 2019)

II. In-depth expert interviews

- 9 hand-picked experts
- Interviews based on Kvale and Brinkmann (2018)
 - Evaluation of **Classical Science Mapping (CSM)**
 - Evaluation **Variable Science Mapping (VSM)**

Variable Science Mapping (VSM)

... with respect to the 12 steps

2. Analyses – III. Comparison

Note: The values for Literature review are transformed to values from 1 to 6 to achieve comparability

3. Conclusion

3. Conclusion

Classical Science Mapping (CSM):

- Actual use: **Thematic clustering**
- Possibilities by experts' estimation: **Bibliometrics, Review questions, Trends, ...**

Variable Science Mapping (VSM):

- Possibilities by experts' estimation: **Antecedents, Consequences, Key Variables, Review questions, Bibliometrics, Research gap, Recommendations, ...**

→ VSM seems to be superior compared with previous approached

4. Future directions

- Further **application** and **testing** of the approach
- **Software-based solution** to automatically scan and analyze papers
